

Financial Innovations for Economic Development: Innovative Finance for SDGs

MBA 55721- Fall Semester 2020

PROFESSOR: Glenn Yago

EMAIL: glenn.yago@mail.huji.ac.il

PHONE: +972.2.563-0175 ext. 34 or 31

OFFICE HOURS: Tuesdays each week for review and/or consultation on project implementation plan

CLASS Sessions: Wednesdays, October 21, 2020-January 22, 2021—Hybrid Course—6:30-9:00 p.m. (Israel Time)

Zoom connection will be provided for on-line students. Classes will be held (subject to Health Ministry guidelines) at the Jerusalem Institute for Policy Research, Seminar Room, Bet Elayshar-Hebrew University of Jerusalem Bldg, 20 Radak St., Jerusalem-Rehavia 9218604 (between Safra and Mt. Scopus Campus). Click [here](#) for maplink.

Prof. Glenn Yago

glenn@jerusalemstitute.org.il

DESCRIPTION

This course will focus on the means and methods of finance applied to social, economic, and environmental challenges facing developing economies. Financial innovations give rise to new intermediaries (e.g., community venture capital, permanent capital facilities, revolving loan funds, social investment banks, business development companies, venture investment trusts, etc.), new types of instruments (e.g., blended finance structured finance, microfinance, social, environmental and development impact bonds, green bonds, diaspora bonds, catastrophic risk bonds, royalty trusts, community investment notes, and risk pooling finance mechanisms and facilities), and new services, platforms or techniques (e.g., ETFs, impact investing, public-private partnerships, financial intermediary facilities, international finance facility for immunization, product development partnerships, value-chain financing) to create jobs, build communities, and enable capital formation and economic growth.

OBJECTIVES

These sessions will survey the application of innovative financing emerging through new products and services, new processes and operations and organizational forms in addressing problems as diverse as entrepreneurial finance, renewable energy, environmental finance, global health, accelerating medical solutions, regional development, affordable housing, urban revitalization and infrastructure. Through case studies and reviews of financial policies, programs and product innovation, students will discover why capital structure matters in aligning diverse interests into new business models for sustainable social and economic change. Students will work through problem sets for innovative financing structures for development projects and enterprises. Students will acquire and apply data gathering, economic, and financial analytical skills to identify specific market failures in developing economies enabling them to apply appropriate financial tools to bridge capital gaps for project and enterprise finance. This would include the ability to identify innovation-led growth targets (e.g., increased crop yields, reduction of disease incidence, lower credit access costs), choose a coherent, time and risk-balanced portfolio of development initiatives required to meet a measurable and tangible development target (e.g., prevention, diagnostics, treatment for global health; job creation and sustainable income and wealth formation); differentiate business, market and technological opportunities for a development target (e.g., on-grid, off-grid, and/or undergrid renewable energy); evolve, accelerate, extend and scale sustainable development

business models; and identify criteria for replication (capitalizing external networks, motivate and reward repeating, positive-sum economic development strategies). We will discover why capital structure matters in aligning diverse interests into new business models for social and economic change to address [Sustainable Development Goals](#) for 2030. Students will research practical applications to financing challenges for economic development.

REQUIREMENTS:

All readings are required. Together with attendance at the lectures and participation in structured discussions they will provide students with a tool kit to develop a concise **proposal** focused on financing a targeted development impact (the course's final project). This end of semester project will be a proposal for the application of an innovative finance product(s) to a project or program that would target a specific sector (agriculture/food, health, energy, or environmental), geography (developing/frontier economy); and/or technology transfer or development application related to the UN's [sustainable development goals](#). This will require a description of the proposed project or program, milestones, project targets, outputs, inputs (including financial, technology and intellectual property inputs), identification and quantification of social, economic and/or environmental outcomes, proposed capital structure, sources and uses of funds and a targeted range of return on investment and social/environmental impact (including identification of potential avoided costs). This would include the identification of specific financial tools (bonds, notes, guarantees and credit enhancement, grants, performance based contracts, revolving loan funds or structured finance product, etc.) and how they might be applied to serve the development target.

Themes for these project proposals would include increasing food and agriculture (agricultural productivity, improve food quality and sustainability), global health (including diagnostics, primary care and community projects, treatment modalities and preventive medicine; bio based and sustainable solutions), energy (low carbon projects and climate change adaptation), and environmental finance (sustainable water, land and forest management, conservation and ecosystem services, biodiversity, drought prevention, carbon projects, etc.). Projects could include:

- **SME finance for enterprise development** (compare and contrast specific private equity, revolving loan fund models, structured finance solution etc.);
- **Environmental or energy infrastructure** (use modern finance mechanisms such as risk pooling and risk transfer to create climate response systems to protect food security, technology transfer for water technology, water quality/recycling, distributed water treatment and production or on-grid, off-grid, or under-grid renewable energy project);
- **Agricultural or food innovation** (plant or soil science technology innovations, post-harvest, or supply chain finance models utilizing agricultural pull-mechanisms);
- **Global health innovation** (development impact bond, product development partnership, advanced market commitment applied to a vaccine, treatment modality, or preventive measure).

These project proposals would address a prospective practical development project and explicate the deployment of a development finance innovation.

The project proposal would address how innovative finance could design a capital structure for a project or development target that mobilizes:

- 1) **new pools of private and public revenue streams;**
- 2) **new revenues options (e.g., tax, charges, fees, bond sales);**

3) new incentives (frontloading and debt-based instruments, philanthropic/government guarantees, public-private partnerships, insurance, and other market-based mechanisms).

These projects can be completed as individual (or teams of two reflecting the team members' increased level of effort to meet this assignment's objective).

Guidelines and an example of such a project implementation proposal will be discussed in the first class on October 21.

Through the projects, students will demonstrate their ability to:

- Design and construct an innovative finance application (for either a proof of concept or beta site project) in a developing economy;
- Measure, analyze and report development impacts of an innovative finance project;
- Identify and develop how a development impact investment would benefit and expand capital access through the creative use of innovative financing tools;
- Assist a high-impact project to access flexible market and below-market financial tools;
- Identify how to structure the transaction and identify potential interested partners with aligned interests in the proposed project.

Assessment:

- Class discussion and attendance 35%
- Final Project Implementation Plan: 65%

EVALUATION

1) Final paper-Project Implementation Proposal

Requirements:

- Students are requested to choose a topic and submit a one-page outline prior class on **(November 25)**
- Upon approval of the topic and the outline, students are required to compose 15-20 pages (double-spaced) and submit the final paper no later than **(January 29)**.
- Late papers will not be accepted.
- The project implementation plan will be based on diagnostic questions the students wish to pursue focused upon a related to one more specific Sustainable Development Goals related to specific impact measurements.
- Their project will need to address the following questions:
 1. What are the financial bottlenecks for the SDG challenges?
 2. Why isn't funding availability? Does the market work?
 3. If not, why not?
 4. Who could fund and what do they care about?
 5. What financial tools can help catalyze that funding through a development capital structure stack or design?

Additional questions that will need to be addressed in each project implementation proposal would also include:

1. **Project:** What is the project proposing to do?
2. **Opportunity:** What need is it meeting? Who is interested in the success of this project? Who are the stakeholders?
3. **Team:** Who is doing it? What is their experience, expertise, roles?
4. **Market:** Who is the customer? What are the marketing channels to reach the customer?
5. **Costs:** How much does it cost to build? To operate?
6. **Capital Structure:** How will it be financed? By whom and under what terms and conditions? What are the returns to each investor?
7. **Plan:** What is the workplan and milestones?
8. **Risks:** What are the risks and how will the risks be mitigated?
9. **Outcomes:** What are the outcomes and how will they be measured?

Students will need to address these issues in their proposal:

- Different innovative financing tools and resulting instruments for potential impact investments;
- Methods of risk mitigation;
- Different models for structuring impact investment funds, blended finance models and capital structures, and pooled-securities to develop the financing pipeline;
- Examine use of catalytic first loss models, grants, loans, equity, etc. that can be mobilized for impact enterprise and project finance addressing development goals.
- Creative ways to target small and middle-size enterprises and projects through pooled securities, revolving loan facilities, fintech, and alternative risk assessment and management models.

These project implementation proposals could be considered for possible Fieldwork fellowships applications by eligible students at the Milken Innovation Center in conjunction with the Blum Lab for Developing Economies at the Jerusalem Institute or existing development finance field sites by other partners in the field in Africa, India, or Latin America as part of our ongoing collaboration between [UC-Berkeley and the Jerusalem Institute-Milken Innovation Center/Hebrew University of Jerusalem School of Business Development Finance Practice Program](#).

2) Final paper (65%)

Requirements:

- Students are requested to choose a topic and submit a one-page outline in class on November 25, 2020. Upon approval of the topic and the outline, students are required to compose 15-20 pages (double-spaced) and submit the final paper no later than **January 29, 2021**.
- Late papers will not be accepted, except under exceptional circumstances.
- The project implementation plan will be based on diagnostic questions the students wish to pursue focused upon a related to one more specific Sustainable Development Goals related to specific impact measurements.
- Their project will need to address the following questions:
 1. What are the financial bottlenecks for the SDG challenges?
 2. Why isn't funding availability? Does the market work?
 3. If not, why not?
 4. Who could fund and what do they care about?
 5. What financial tools can help catalyze that funding through a development capital structure stack or design?

Additional questions that will need to be addressed in each project implementation proposal would also include:

- **Project:** What is the project proposing to do?
- **Opportunity:** What need is it meeting? Who is interested in the success of this project? Who are the stakeholders?
- **Team:** Who is doing it? What is their experience, expertise, roles?
- **Market:** Who is the customer? What are the marketing channels to reach the customer?
- **Costs:** How much does it cost to build? To operate?
- **Capital Structure:** How will it be financed? By whom and under what terms and conditions? What are the returns to each investor?
- **Plan:** What is the work plan and milestones?
- **Risks:** What are the risks and how will the risks be mitigated?
- **Outcomes:** What are the outcomes and how will they be measured?

Students will need to address these issues in their proposal:

- Different innovative financing tools and resulting instruments for potential impact investments;
- Methods of risk mitigation;
- Different models for structuring impact investment funds, blended finance models and capital structures, and pooled-securities to develop the financing pipeline;
- Examine use of catalytic first loss models, grants, loans, equity, etc. that can be mobilize for impact enterprise and project finance addressing development goals.
- Creative ways to target small and middle-size enterprises and projects through pooled securities, revolving loan facilities, fintech, and alternative risk assessment and management models.

- 3) **Completion of case study write-ups and readings presentations for class discussion:** You will be asked to review and present case studies and/or readings related to the course from those listed below. Students will be asked to choose their presentation groups by the end of the first class. This summary presentation and related class attendance and engagement in lectures and questions will comprise the second area of course evaluation. **(35%) Please note presentation sign-up page on the course website on Moodle.**

COURSE UNIT OVERVIEW*

*Instructor Lecture and Overview (either synchronous or asynchronous) will precede each Guest Lecture or briefer case study presentations as noted below

I. Introduction to Finance Toolkit and Innovative Finance (October 21)

II. Structural Changes in Capital Markets and Development Finance (October 28)

- a. Global Trends
- b. What is Financial Innovation? From Structured to Blended Finance
- c.

*Practitioner Guest Lecture: *Carole Biau and John Shellhase, Global Market Development Center-Milken Institute, Capital Market Infrastructure and Developing Markets*

III. Why and How does Capital Structure Matter? (November 4)

IV. Entrepreneurial Finance (November 11)

Practitioner Guest Lecture:

*David Ram, Partner, Goldrock Capital; Chair, Ogen – Israel Social Loan Fund Committee. **Creating a Capital Structure for a Social Bank** (<https://ogen.org/en/>)*

*Ana Quriola, Avenews, Former Fellow, **FinTech for Agri-Trade: Digitizing the Supply Chain***

- a. Lifecycle of Finance
- b. Business Finance and Capital Structure
- c. Equity, Debt finance, and Hybrid Debt Instruments
- d. SME Finance

V. Impact Investment and Social Finance: Social Impact Bonds and Beyond (November 18)

*Practitioner Guest Lecture:

*Gila Norich, Director, Advisory Services, Social Finance-Israel, **Impact Metrics and Development Impact***

*Oluwagbemisola Akinsipe, Energy and Resources Engineering, University of California-Berkeley, **Development Impact Bond for Secondary Education Achievement in Nigeria***

- a. Pay for performance contracting
- b. Full-spectrum Asset Class Product and Program Development Finance
- c. Risk-Return-Impact: Metrics

VI. Financing Ideas: Science and Tech Finance (November 25)

Special Session: Project Implementation Plan Workshop with African Mentors

Dr. Olawale Olayide, IMAGES-University of Ibadan, (*Agriculture and Food Systems*)

Prof. Desalegn Ayal, Center for Food Security, University of Addis Ababa, (*Agriculture and Food Systems*),

Dr. Greenwell Matchaya, International Water Management Institute, South Africa, (*Water*)

Dr. Olufunke Alaba, School of Public Health and Family Medicine, University of Cape Town, (*Health and Zoonotic Diseases*)

Steve Zecher, Jerusalem Institute-Milken Innovation Center, (*FinTech/Financial Inclusion*)

Prof. Glenn Yago, Hebrew University of Jerusalem School of Business/Jerusalem Institute-Milken Innovation Center, (*Energy*)

Guest Lecture: Prof. Andrew Lo, Financial Engineering Lab, MIT, **Can Financial Engineering Cure Cancer?**

- a. From Venture Capital Models to Research Bond Obligations

VII. Project Finance Mechanics 1 (December 2)

Practitioner Guest Lecture:

Caitlin Maclean, Innovative Finance, Milken Institute, **Financing Urban Resiliency**

- a. Infrastructure Projects
- b. Urban Revitalization

VIII. Project Finance Mechanics 2 (December 9)

- a. Housing
- b. Cultural Heritage and Tourism

IX. Environmental Finance (December 16)

Practitioner Guest Lecture:

Climate Change and Financial Innovation

Frederic Samama, Chief Responsive Investment Officer, CPR-Amundi Group

X. Development Finance—Blended Finance (Case Study Applications) (December 23)

Practitioner Guest Lecture:

Jeremy Bentley, Citi Group (Israel), **Blended Financing and Themed Bonds: Lowering the Cost of Capital**

XI. Development Finance-Energy (Case Study Applications) (December 30)

Practitioner Guest Lecture:

*Angela Homsy and Yariv Cohen, Ignite Power, Aganza Fund, **Structuring Impact Projects***

XII. Development Finance—Food-Water Nexus (Case Study Applications) (January 6)

Practitioner Guest Lecturers:

Dr. Olawale Olayide, IMAGES, University of Ibadan

*Naty Barak, Chief Sustainability Officer, Netafim/Obia, **Community Irrigation Model: Case of Karanataka***

Case Study: Kangai Elosy Mathiu, Fellow, **Small Scale Irrigation Hub and Spoke Model** (Kenya)

XIII. Development Finance –Global Health (January 13)

Practitioner Guest Lecture:

Ariel Beery, Co-Founder and CEO, Mobile ODT/ General Partner, Co-Velocity, **Sustainable and Scalable Solutions in Global Health**

XIV. Project Implementation Plan Presentations by Student Teams (January 20)

With Mentors:

Dr. Olawale Olayide, IMAGES-University of Ibadan, (*Agriculture and Food Systems*)

Prof. Desalegn Ayal, Center for Food Security, University of Addis Ababa, (*Agriculture and Food Systems*),

Dr. Greenwell Matchaya, International Water Management Institute, South Africa, (*Water*)

Dr. Olufunke Alaba, School of Public Health and Family Medicine, University of Cape Town, (*Health and Zoonotic Diseases*)

Steve Zecher, Jerusalem Institute-Milken Innovation Center, (*FinTech/Financial Inclusion*)

Prof. Glenn Yago, Hebrew University of Jerusalem School of Business/Jerusalem Institute-Milken Innovation Center, (*Energy*)

Course Assignments and Readings (Detailed Study Plan)

Reference Resource throughout course: [Miken Institute 5-Minute Finance](#)

The course presumes some basic knowledge of economics and finance. Please use our 5-Minute Finance app above for review as well as the Glossary and Appendix link supplied as part of the course.

Remedial review and terms (present value, compound interest, understanding capital structure, investment and consumption, Black-Scholes Formula, forward and future contracts, etc.) are easily accessible at [Kahn Academic Finance and Capital Markets](#).

****Required Readings for Lectures**

***For Student Presentations**

I. Introduction to Financial Toolkit and Innovative Finance for Development

1. ****Allen, Franklin and Yago, Glenn. "Financing the Future: Market-Based Innovations for Growth". Upper Saddle River, New Jersey: Pearson/Wharton School Publishing, 2010:**
 - a. Chapter 1: The Evolution of Finance;
 - b. Chapter 2: A Framework for Financial Innovation: Managing Capital Structure.
